

**A6 Sedan**

## How much time would you like to take to discover the new Audi A6 Sedan?

Time is our most precious resource. We want you to be able to enjoy yours more. Just like the new Audi A6 Sedan, this brochure makes your life easier, wasting none of your time by clearly presenting content as a series of moments.

Take your time and discover how the Audi A6 can help you get the most out of it.

This is your time. Audi is more.  
The new Audi A6 Sedan.

Enjoy the moment.  
No matter where you are.

Calmly anticipate the surprises of everyday life: with the driver assist systems in the Audi A6 Sedan. No matter whether it's about collision warning in complex traffic situations, or active accident prevention – assist systems like crossing assist and swerve assist will give you all the active support you need. That way, you can enjoy greater control and a more relaxed drive.

Please note: The systems work only within system limits and assist the driver.  
However, the driver remains responsible for driving the vehicle and is required to be attentive.

## Noticeably more possibilities.

More functions, fewer buttons: the MMI navigation plus with MMI touch response allows to control many features of your Audi A6 intuitively via a high-resolution 10.1-inch HD touch display. As easy to operate as your smartphone. And with haptic feedback confirming each selection, you can safely use the system even while driving.

Take your time .

Make time for yourself.

Return to yourself. Just like the new Audi A6 Sedan. Impressive design that recalls Audi quattro architecture, recognisable by the deep, sporty shoulder line and the flared wheel arches. The upright and wide Singleframe gives the new Audi A6 Sedan the progressive dynamics quintessential of an Audi.

The quattro architecture above the wheel arches gives the side of the new Audi A6 Sedan a muscular look. The sporty roof line accentuates the coupé-like silhouette.

This is where you make up time.

Tailor your driving time to your expectations. With the Audi MMI navigation plus, you can choose what driving information is displayed on the high-resolution 10.1-inch HD touch display or in the 12.3-inch HD Audi virtual cockpit. Haptic feedback on the touchscreens confirms each selection and gives you a quick and intuitive way of operating all functions. A faster way to reach your destination – or perhaps discover something even better. You choose how to spend your time.

Change the present.  
And the possibilities.

The new Audi A6 Sedan offers you more while using less. Thanks to the more powerful 48V electrical system, more braking energy is stored through recuperation than in vehicles that don't feature hybrid drive systems. Thanks to the belt alternator starter, this energy can supplement that of the combustion engine – for example when the vehicle is started or by electrically releasing additional torque.

# Audi intelligent technologies Using more moments.

The new Audi A6 Sedan – an exceptional vehicle whose diverse range of outstanding equipment will impress you. Numerous innovations, comfort and convenience features and assist systems make each journey special.

The figures for fuel consumption and CO<sub>2</sub> emissions can be found on page 66.  
Some of the equipment illustrated or described is optional equipment for which an extra charge is made.  
Please contact your Audi partner or visit [www.audi.com](http://www.audi.com) for detailed information about standard and optional equipment.

The next step towards realising our vision of piloted driving. In the new Audi A6 Sedan, you can experience the mobility of the future today. With the option of advanced assist systems and helpful automated driving functions. For even more convenience. And that fascinating feeling of having been transported to the future.

## Audi intelligent technologies

### ***Rear cross traffic alert***

Cross traffic assist rear can warn occupants about a potential collision with approaching cross traffic when reversing at speeds of up to 10 km/h. Within system limits, the system uses radar sensors to monitor vehicles to the rear and side when exiting a parking space.

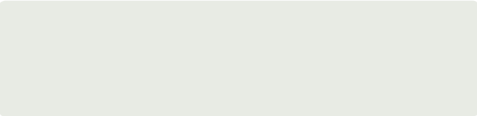

### ***Exit warning***

Multiple sensors see more than two eyes: exit warning alerts occupants when opening a door while the vehicle is stationary of a possible collision with traffic approaching from the rear. Within system limits, the system uses the radar sensors to monitor vehicles to the rear and side.

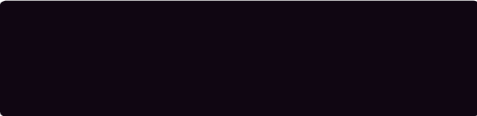

A6 Sedan – cast aluminium wheels in multi-spoke design (illustrated here: cast aluminium wheels in 5-V-spoke design, contrasting grey, partly polished\*)
